

## Airsafe 510 Life raft

### Designed for HAHO parachute systems

The Airsafe 510 is a single seat life raft based on the RFD LRU23P, designed for and in close co-operation with the Swedish Armed Forces Special Forces.

It is manufactured from high frequency welded polyurethane proofed nylon fabric with an inflatable floor and canopy for maximum protection. The life raft comes tightly packed in a comfortable seat sling and attaches to the bottom of the parachute harness. The integral fabric sheet in the seat is fastened by snap hooks to the parachute rear.

The Airsafe 510 life raft deploys either manually using the integrated ripcord or automatically by the ripcord attached to the operator's life preserver.

Second-to-none in combination with a HAHO parachute system, the Airsafe 510 Life Raft is a safe backup causing minimal obstruction when attached to the harness.

*Attaches to the bottom of the harness*

#### Technical Data

Part Number:	2-0510
Military Stock Designation:	M7388-143011 Nödutrustningspacke 143
Weight:	5 kg (incl CO <sub>2</sub> bottle)
Dimensions:	(L x W x H)
Valise	500x180x120 mm
Life raft, inflated	1570x980x820 mm
Colour:	Black
