

Airsafe 1560 Lightweight Door Gunner and Helicopter Crew Harness

Safe, comfortable and flexible

Designed to be worn underneath other equipment such as life jackets or combat vests, the Airsafe 1560 harness was originally developed for the Royal Norwegian Air Force. It provides great flexibility at minimum weight.

Helicopter crew especially such as door gunners, snipers and hoist operators benefit from its running attachment ring which allows unrestricted movement and makes the harness easy to integrate with combat vests, ballistic vests and life jackets.
